Assembly

1. Starting from the base section and working your way to the top.
Slide each telescoping section together lining up the holes.
2. Insert the stainless-steel screws and tighten. **(DO NOTE OVER TIGHTEN)**
3. Mount the Station Master on a suitable mast with supplied U-Clamps.
4. Connect your coax cable to the SO239 and weatherproof connection.
5. Your antenna has been pre-tuned at the factory. If need be you can adjust the **SWR** from 1st lowering and raising of the top section and 2nd fine tuning from the tap point.
